ABOUT THE COLLECTION

Three-layer engineered oak flooring

The catalogue currently holds more than 70 engineered oak designs — every one of them three-layer European oak, with prices starting at 37,95 €/m², VAT included. Formats cover the full spectrum, from 550×110 mm boards to 2200×260 mm XL planks, all 14–15 mm in overall thickness. By tone, natural shades lead the way (48 designs), joined by 14 light and 12 dark; 12 designs are laid in a herringbone pattern and 24 belong to the XL format.

Start with the finish: 62 designs are oiled, 5 lacquered and 6 smoked. An oiled surface can be renewed locally without sanding the entire floor — we compare the two approaches in our guide to oiled versus lacquered boards. The second thing to check is the top layer: 51 designs carry a 3 mm and 23 a 4 mm oak wear layer, which decides how many times the floor can be re-sanded over its lifetime. Every board in the catalogue suits water-based underfloor heating — in that case we recommend gluing the boards to the subfloor; the reasoning is set out in our guide to engineered oak over underfloor heating.

Before you order, measure your rooms and work out the quantity with a cutting allowance in the m² calculator — the minimum flooring order is 20 m². It is worth checking the tone under your own lighting: we send up to 3 free parquet samples. Orders are delivered across the EU within 5–10 working days; delivery costs 129.95 € and is free on orders over 2 000 €. Depending on the collection, the boards are covered by a warranty of up to 15 years.

How to choose

Top layer: 3 or 4 mm

In the catalogue, 51 designs carry a 3 mm and 23 a 4 mm oak top layer; overall board thickness is 14–15 mm. A thicker layer withstands more sandings, so 4 mm is worth choosing for hard-working rooms or a longer service life. For average residential traffic, 3 mm is usually enough.

Pattern and format

Dimensions run from 550×110 to 2200×260 mm: the 24 XL designs leave fewer joints across a large floor, while the 12 herringbone designs suit classic interiors. By tone, natural shades dominate (48), alongside 14 light and 12 dark designs.

Finish: oiled, lacquered or smoked

62 designs are oiled, 5 lacquered, 6 smoked. An oiled surface can be repaired locally — a scratch is sanded out and re-oiled — though it asks for periodic maintenance oil. A lacquered surface needs no oiling, but repairs mean refinishing a larger area.

Installation and underfloor heating

Some designs connect with a click system, others tongue-and-groove; some are made to be glued down. Over water-based underfloor heating we recommend gluing to the subfloor, while a floating click installation is handy when you want the floor down quickly and without adhesive.

COMPARISON

Which way to go

Criterion	Oiled	Lacquered	Smoked (oiled)
Designs in the catalogue	62	5	6
Surface	matt, with the wood grain felt underfoot	smooth, sealed lacquer layer	oiled, deeper-toned oak
Local repair	yes — the damaged spot is sanded and re-oiled locally	no — a larger area is sanded and re-lacquered	yes — as for oiled
Routine care	cleaning plus maintenance oil as traffic demands	cleaning only, no oiling needed	cleaning plus maintenance oil as traffic demands
Construction and thickness	three-layer oak, 14–15 mm	three-layer oak, 14–15 mm	three-layer oak, 14–15 mm
Underfloor heating	suitable, glue-down recommended	suitable, glue-down recommended	suitable, glue-down recommended
